

As a Cloud Architect, you guide your clients in their transition to the cloud, more specific the Microsoft Azure Cloud. Supported by your extensive knowledge and experience of Microsoft technology, you develop end-to-end solutions. You are known as a competent professional in one or more of these fields:

- AI, big data of IoT
- Azure infrastructure
- Migration of cloud applications
- Native cloud apps projects
- Cloud DevOps and governance model design
- ...

As part of a team, you implement your knowledge for client oriented, creative, performant, scalable and reusable IT solutions. You start from a design presented by the Enterprise Technology Architect and translate it into a technical implementation plan. With a pragmatic approach and support of the 45 Degrees framework, you manage the complexity of your projects and guide your clients to the cloud.

Your profile

For this role, we are looking for experienced professionals. We ask 10 years of relevant experience in IT, from which about 5 years in architecture. In addition to your technical knowledge, the role of Cloud Architect requires strong skills in project management, analysis and decision making. You are a motivated self-starter, a team player who communicates effortlessly. As a trusted advisor for your clients you dare to challenge them.

Ideally you have an Azure Fundamentals certification. If not, you have the ambition to get one in the near future. And this is only the start of your certification journey. All 45 Degrees Cloud Architects are (or will become) Azure Solutions Architecture Expert certified.

What do we offer?

45 Degrees is situated on the cutting edge of innovation and digital transformation and at the heart of the Microsoft business within the Cronos Group, the largest IT community In Belgium with Its 500 companies and 6.500 people.

In addition to ensuring the safety of a strong and stable environment, companies also retain the agility of a start-up.

- You will be part of the largest IT network with expertise in various fields
- You work in an environment where innovative entrepreneurship is of key importance
- With our exclusive focus on cloud architecture, you will join a club of like-minded
- You have the opportunity to deepen your skills
- You will be offered exciting opportunities with a lot of variation through different projects and clients
- You can count on an attractive salary supplemented with extra-legal benefits
